Name - Nirmal Giri

Class Roll no. - 37

Section - K

University Roll no. - 1918515

End-term practical

Cloud computing -

3. Write the steps to create a repository, upload the contents and publish the repository through Github pages.

1) Open your Github account.

2) You will see drop down menu having a '+' sign in the upper-right corner at the home page. Click on it and select New repository.

3) Type a short, memorable name for your repository.

4) Optionally, add a description of your repository

5) Choose a repository visibility.

6) Select Initialize the repository with a README

7) Click Create repository.

8) Once the repository is created, you will see an option of "Add File"

9) By clicking on it you can add files from your desktop or any other devices you are logged in.

10) Once you add your desired files in your repository to show the implementation of your repository go to Settings > Github Pages > Choose Branch as master > Save.

11) By clicking the save button a link will be generated.

12) Click on the link and your desired result will be shown.

3. Create a repository and publish it.
