

Q3 (a) Creating Repository

1. Go to your GitHub account and select your Repositories.
2. Click new.
3. Fill in the details. Such as name, details, ~~the~~ description, etc and select create Repository.
4. Uploading content to the Repository created.
5. Now go to that Repository and select the files that you want to upload.
5. After uploading click commit changes and files will be uploaded and published.

Quick setup — if you've done this kind of thing before

Set up in Desktop or HTTPS SSH

https://github.com/ritikthapliyal/Beginner_Python_projects.git

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

...or create a new repository on the command line

```
echo "# Beginner_Python_projects" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/ritikthapliyal/Beginner_Python_projects.git
git push -u origin main
```

...or push an existing repository from the command line

```
git remote add origin https://github.com/ritikthapliyal/Beginner_Python_projects.git
git branch -M main
git push -u origin main
```

Windows taskbar with icons for Start, File Explorer, Edge, Task View, and various applications. System tray shows time 09:49, date 19-06-2021, and network/volume icons.
