

## Harshit Saini Section - K

Q3.

### Steps to Create a repository.

- Go to github.
- Create Click on Create a new Repository.
- Name the Repository what you want to name it.
- Make the repository Public or Private, as per your requirement.
- Click on Add to README File.
- Click to Create a repository your repository will be created.

### Upload the Content on github.

- On github, navigate to the main page of the repository.
- Then click to add file and then click to upload file.
- Drag and drop the file or folder you want to upload to

your repository.

- Then your file will be uploaded and you can see that file on Github.
- Click to Commit Changes and your file will be uploaded successfully.

### Publish a Repository

- Name it username.github.io. Make sure the "push to Github" box is checked.
- Move your website's file into folder that Github just created when you made the repository.
- Back in the Github application, you should see your files in the left column.
- Click the "Publish repo" in the top right corner.
- Give it about 10 minutes, then check your ~~go~~ username.github.io. Your website should be there.
